COMMUNICATION

I take great consideration in what proper communication could contribute to a project. It is detrimental for collaborations to work, hence, one of my most valued assets is that I am able to properly receive and respond to information.

LEADERSHIP

I have mostly been a leader during my academic years, and it proves my collaboration skills, competence, and drive to bring out the best in what a team can offer. Leadership is not for the weak and a responsibility that I am willing to take.

EDUCATION

STI College Legazpi | Legazpi, Albay
